PROFILE

A disciplined software developer and lifelong learner, I'm constantly driven to improve (and enjoy) myself along the way! Surrounded by supportive and inspiring individuals, I'm motivated to keep growing, building, and exceeding expectations of those around me.

PROFESSIONAL EXPERIENCE

Plastic Printers

06/2023 – Present

Web Developer

Hastings (MN),

United States

Skills: B2C, B2B & D2C · GraphQL · Google Analytics · E-Commerce · Shopify Plus · HubSpot (enterprise) · Web Development · JavaScript, Liquid, HubL, HTML, CSS, Data Entry, Graphics, SEO, Accessibility, and general web standards.

Roles:

- Part Web Developer, part Software Engineer, and part Marketer, I would collaborate across teams while utilizing my knowledge and ideas throughout the infrastructure.
- Determined appropriate integrations to use to optimize the platforms and streamline processes, including A/B testing various platforms, gauging their positive and negative qualities.
- Created dynamic content for marketers and editors to be able to customize the platforms while needing minimal coding experience.

Prime Digital Academy

2022 – 2023

Full Stack Software Engineer

Minneapolis, MN,

United States

- Implemented Javascript, Node.js, React.js, CSS/HTML, PostgreSQL, RESTful Architecture, APIs, and created full stack applications in Agile & Waterfall settings.

Milestone projects included:

- Missing Link  - Bridging the gap between the data of patients and their ailments, researchers are able to draw conclusions from seemingly unrelated characteristics among those with shared conditions and diseases.
- Queerspace Collective  - Together with my group, we centralized the company's pre-existing services, created a smooth experience for users, and provided seamless interaction between the server and client to pave the way for LGBTQ+ youth to develop the confidence to be themselves.

Mallards, Axel's Bonfire, Tobies Restaurant & Bakery

Waiter

- Mastered time management under pressure, resulting in higher sales and satisfaction amongst my guests.
- Asked daily by guests and built strong relationships, resulting in many regular patrons to the restaurants I served at.
- Curated a warm and welcoming environment for those of all genders, races, and orientations.
- Proved myself trustworthy with reliable attendance and behavior, took on others' responsibilities when needed, and was an overall dependable asset to all teams I supported and led.

2017 – 2022

Forest Lake, Blaine,
Hinckley (MN),
United States

EDUCATION

Prime Digital Academy

Full Stack Software Engineering Certification

- Hosted and deployed many full stack web applications through AWS and Heroku, and continued post-education.
- Contributed and led in group collaboration, encouraging those around me to play to their strengths and learn from their weaknesses.
- Version control collaboration in development ensured accountability between myself and those I worked with in an organized system.
- Wrote impactful code, which meant testing, being intentional, and being effective with the functionality and reusability of the code I created.

2022 – 2023

Minneapolis, MN,
United States

Lake Superior College

Associates

- Led calm and organized radio and verbal communications within my team which resulted in successful completion of intense, real-life scenarios. This training prepared me for high stress situations and to always keep a level head.
- Completed critical, time sensitive tasks effectively and efficiently under deadlines, always within a collaborative setting.

2014 – 2016

Duluth, MN, United States
